

# Dispense Works Inc. & Kwik Mark Internship 2019

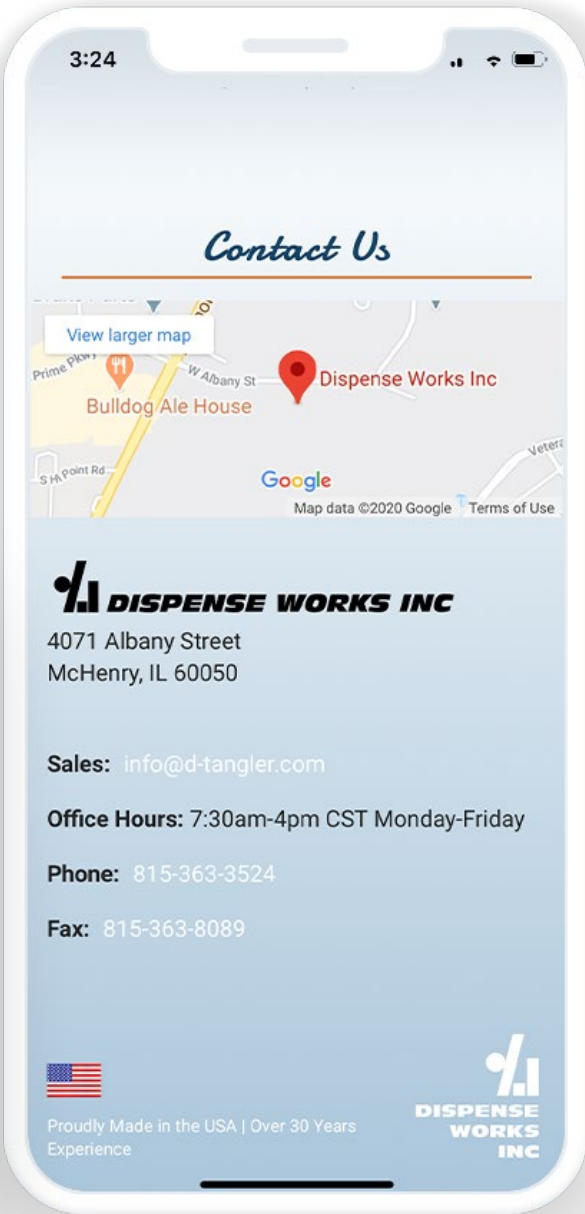

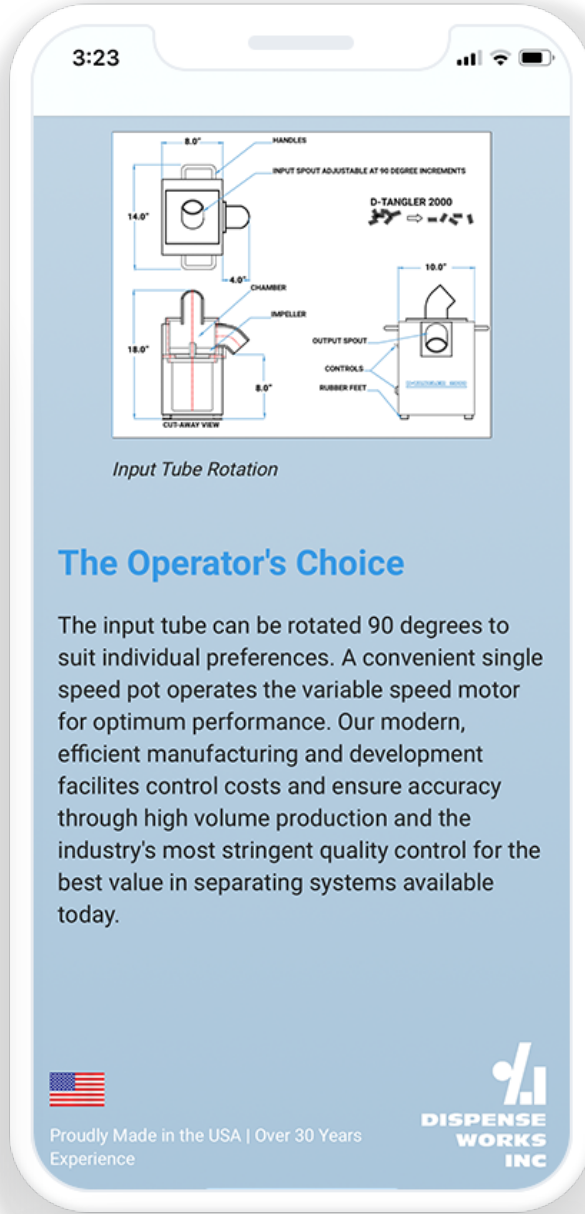

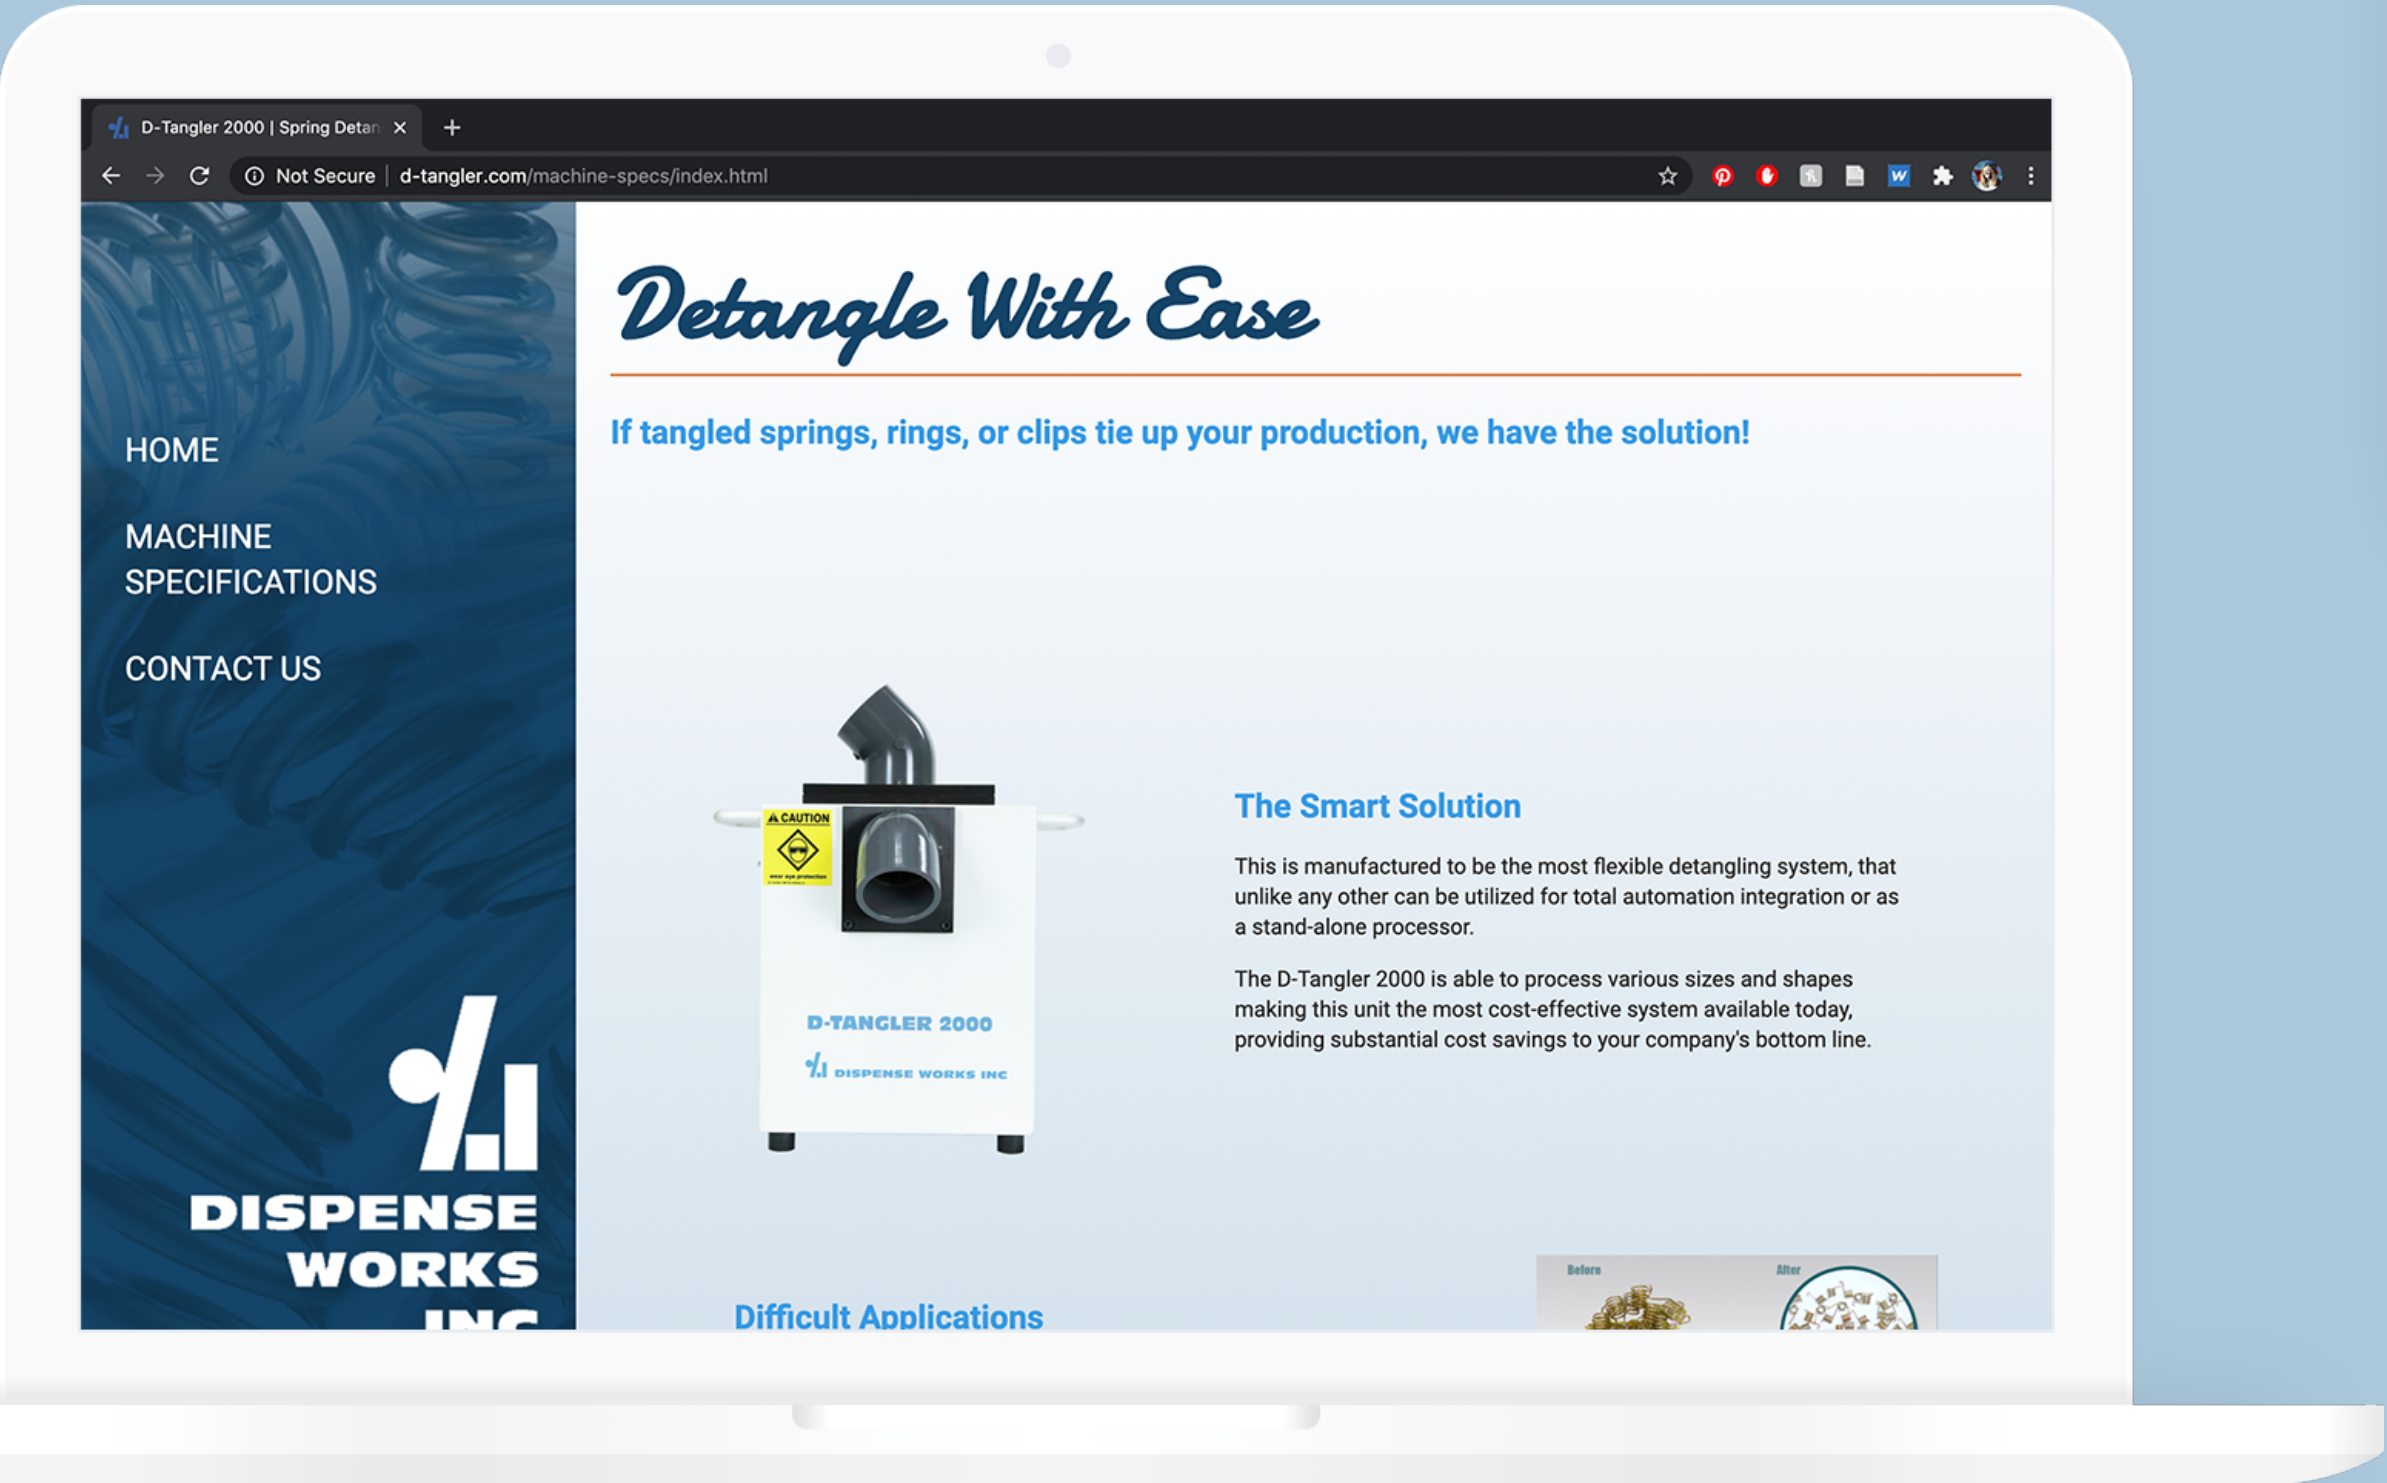

During the summer of 2019 I completed a graphic design internship with the machine manufacturers Dispense Works. During my time here I redesigned and developed the website for the D-Tangler 2000, a spring detangling machine. I also created ads for publication in various magazines and videos to post on social media.

# The D-Tangler 2000 Website

View it live:

# D-Tangler Brochure

# Dispense Works Social Media Posts

In addition to redesigning the website and marketing materials for the D-Tangler 2000, I also created videos showcasing the capabilities of various machines for publication on the company's social media channels.
